Brand New Book ***** Print on Demand *****.With every natural disaster that comes to pass, I feel deep sorrow for the victims who lose their lives as well as their families but also those who endure financial difficulties due to loss of property and their means of survival. All these natural disasters share a common suffering felt same way no matter what part of the world the disaster takes place. Whether the victims of the tsunami; those in the 2004 earthquake in Turkey, or those in Iran and Pakistan; and those lost to Katrina in the USA in 2005, the disaster is followed by anxiety, pain, and a loss of hope. My concern and sadness for those who lost their lives due to these natural disasters drove me to compose disaster, environmental pollution, population growth, global warming, wars, and racial discrimination. The story touches on the development of science in such a way that would lead to uniting the people of the Earth and those who live in other galaxies to work collaboratively when facing different natural disasters. In other words, people from outer space would come to the aid of the people on Earth when there is a disaster of some sort and vice versa. The story also shows the reader how to control the actions of criminals or those who go insane. The events that lead to the rescue of the people from Earth, their departure to a different planet, and their eventual return home will surely fill the heart of the readers with homesickness and warmth.
